Work Experience

Self Employed

Jun 2025 – Present

FullStack Engineer

- Full Stack Engineer (self-employed) Currently building web and mobile applications for clients and side projects.
- Built an e-commerce platform for a local business.
- Continuously working on projects to expand skills in full stack and mobile development.
- NextJS, ExpressJS, Tailwind, Supabase, PostMan, React Native, Framer, Socket.io

Innovick

Feb 2025 – Jun 2025

FrontEnd Developer Intern

- Completed a remote internship at Innovick as a frontend developer, where I gained hands-on experience in advanced web development and app development.
- Built and deployed a mobile application, available on my GitHub [https://github.com/mihsanalam/Kasem-Garments].
- Developed skills in [JS, React, React Native, API integration, Figma, Firebase, and system design].

Education

Dr Muhammad Shahidullah, Dhaka

Jan 2024 – Present

Business/Commerce, General

Projects

- **J-Creation — Full-Stack E-Commerce Platform (2026)** Built a premium full-stack e-commerce platform for a real local business, live at jcreationbd.com. Designed with a cohesive brand identity and built to production standards with enterprise-grade security and unique features not commonly found in regional e-commerce.
- **Kasem Garments — Inventory Management App (2025)** Built a comprehensive mobile inventory management app for a real garment business during my internship at Innovick. Designed to replace manual stock tracking with a fully digital solution for business owners and staff.
- **Syntonic — Real-Time Chat Application (2025)** Built Syntonic, a full-stack real-time chat application with direct and group messaging capabilities. Features live message delivery, user authentication, and a clean mobile UI. Built as a personal project to deepen knowledge in real-time technologies and full-stack development.
